INDEX TO SUBJECTS

A

Absorption of *Musca domestica* screening pigment, 1087

Acetylcholine and high potassium depolarization, influence on calcium exchange in rat uterus, 1299

Acid, amino, and sugar transport in rabbit ileum, 849

—, deoxyribonucleic, from bacteriophage lambda, structure and function, July suppl., p. 29

—, deoxyribonucleic, circular, physical and topological properties, July suppl., p. 103

—, deoxyribonucleic, deoxyribonuclease-treated, in *Bacillus subtilis* transformation, integration, July suppl., p. 233

—, deoxyribonucleic, methylation, July suppl., p. 5

—, deoxyribonucleic, molecules, arrangement of information in, July suppl., p. 143

—, deoxyribonucleic, from phage-infected bacteria, properties, July suppl., p. 127

—, deoxyribonucleic, recombining, in pneumococcal transformation, genetic studies, July suppl., p. 211

—, deoxyribonucleic, replication, enzymatic mechanisms, July suppl., p. 59

—, deoxyribonucleic, –dominated biological universe, problems of ribonucleic acid genome operating in, July suppl., p. 263

—, ribonucleic, genome operating in deoxyribonucleic acid–dominated biological universe, problems of, July suppl., p. 263

—, ribonucleic, soluble, leucine-specific, changes after infection of *Escherichia coli* by phages T2 and T4, 1139

Acids, amino, sugars, steroids, and other organic compounds, penetration into interior of squid giant axon, 47

—, nucleic, enzymatic phosphorylation of, and its application to end-group analysis, July suppl., p. 81

Adaptation and light responses of *Phycomyces*, kinetic model for, 925

Ameba *Chaos chaos*, ionic and bioelectric properties, 151

Amino acid and sugar transport in rabbit ileum, 849

— acids, sugars, steroids, and other organic compounds, penetration into interior of squid giant axon, 47

Ammonium ions, quaternary, uptake by human erythrocytes, 1147

Amphibian muscles, osmotic properties, 37

Amyloplast starch, geotropic response of wheat coleoptiles in absence of, 1065

Anaerobic metabolism and anaerobic sodium transport by isolated turtle bladder, effects of dinitrophenol and oligomycin on coupling, 483

— sodium transport and anaerobic metabolism by isolated turtle bladder, effects of dinitrophenol and oligomycin on coupling, 483

Anesthesia, local, and calcium and magnesium, 845

Anesthetics, local, and calcium, competitive action on lobster axon, 1043

Anisosmolal solutions, cell ion and water contents in, cat heart muscle in vitro, 641

Arcs, blue, of retina 405

Axon, giant, lobster, blockage of sodium conductance increase in, by tarichatoxin (tetrodotoxin), 977

—, giant, squid, penetration of sugars, steroids, amino acids, and other organic compounds into interior, 47

—, lobster, competitive action of calcium and procaine on, mechanism of action of local anesthetics, 1043

— and Schwann cell of squid nerve fiber, sodium, potassium, and chloride concentrations in, 1

Axons, squid, space-clamped, temperature characteristics of excitation in, 1007

B

Bacillus subtilis transformation, integration of deoxyribonuclease-treated deoxyribonucleic acid in, July suppl., p. 233

Bacteria, phage-infected, properties of deoxyribonucleic acid from, July suppl., p. 127
Bacteriophage lambda, internal structure, July suppl., p. 171
— lambda, structure and function of deoxyribonucleic acid from, July suppl., p. 29
Bacteriophage-infected bacteria, properties of deoxyribonucleic acid from, July suppl., p. 127
Bacteriophages T2 and T4, changes in leucine-specific soluble ribonucleic acid after infection of *Escherichia coli* by, 1139
Barnacle, muscle fiber membrane, effects of intracellular calcium ion concentration on excitability of, 807
Beetroot tissue, influence of intracellular potential on potassium uptake by, 551
Bioelectric and ionic properties of ameba *Chaos chaos*, 151
Biological universe, deoxyribonucleic acid–dominated, problems of ribonucleic acid genome operating in, July suppl., p. 263
Biosynthesis, polysaccharide, July suppl., p. 331
—, protein, problems in, July suppl., p. 305
Biosynthetic reagent, evolution of oxygen as, Sept. suppl., p. 253
Bladder, toad, epithelial cells, isolated, surface charge, effect of hydrogen ion concentration and divalent ions on mobility, 501
—, turtle, isolated, effects of dinitrophenol and oligomycin on coupling between anaerobic metabolism and anaerobic sodium transport by, 483
Bullfrog, isolated small intestine, active transport of D-xylose in, 1029
— skin potential, interaction between effects of inside and outside sodium and potassium on, 309

C

Calcium binding by particle-free supernatants of homogenates of skeletal muscle, 131
—, cellular transport in rat liver, 743
— distribution and exchange in rat uterus, 1265
—, effect on desensitization of membrane receptors at neuromuscular junction, 963
Calcium exchange in rat uterus, influence of high potassium depolarization and acetylcholine, 1299
— ion concentration, intracellular, effects on excitability of muscle fiber membrane of barnacle, 807
— ion movement and electrical stimulation in sarcoplasmic reticulum, in vitro interaction, 689
—, magnesium, and local anesthesia, 845
— and procaine, competitive action on lobster axon, mechanism of action of local anesthetics, 1043
— and sodium spikes, differences, effects of tetrodotoxin, procaine, and manganese ions, 793
Carbon dioxide and oxygen, active transport into swim-bladder of fish, 1209
— monoxide + hemoglobin → carbonylhemoglobin reaction, cell and solution velocity constants at different temperatures in mammals with different red cell sizes, 199
Carbonylhemoglobin, carbon monoxide + hemoglobin →, reaction, cell and solution velocity constants at different temperatures in mammals with different red cell sizes, 199
Cardiac excitability and contractility, ionic dependence, 781
— muscle of mouse, electrotonic spread in, 1089
Cat extraocular muscles, in vivo studies on fast and slow muscle fibers in, 1177
— heart muscle in vitro, cell ion and water contents in anisosmolal solutions, 641
Cation content regulation in cation transport in *Escherichia coli*, 221
— transport in *Escherichia coli*, potassium exchange, 469
— transport in *Escherichia coli*, regulation of cation content, 221
Cations, external, effects on intracellular potential, electrical properties of *Neurospora crassa*, 69
—, heavy metal, topochemical factors in potentiation of contraction by, 937
Cell, effects of external cations on intracellular potential, electrical properties of *Neurospora crassa*, 69
—, effects of intracellular calcium ion concentration on excitability of muscle fiber membrane of barnacle, 807
—, intracellular potential, influence on potassium uptake by beetroot tissue, 551

Cell, intracellular potential and respiration, electrical properties of *Neurospora crassa*, 93
— ion and water contents in anisosmolal solutions, cat heart muscle in vitro, 641
—, Schwann, and axon of squid nerve fiber, sodium, potassium, and chloride concentrations in, 1
— and solution velocity constants for reaction carbon monoxide + hemoglobin → carbonylhemoglobin at different temperatures in mammals with different red cell sizes, 199
Cells, egg, *Triturus*, during cleavage, electrical characteristics, 1019
—, epithelial, toad bladder, isolated, surface charge, effect of hydrogen ion concentration and divalent ions on mobility, 501
—, heart, chick, cultured, pacemaker and nonpacemaker, ionic interconversion, 867
—, muscle, ion accumulation in, 819
—, supramedullary, puffer, analysis of potassium inactivation and tetraethylammonium action in, 629
— and tissues, oxygen reaction with respiratory chain in, Sept. suppl., p. 163
—, visual, *Limulus* eye, sinusoidal and delta function responses, 565
Cellular electrophoretic mobility and mitotic cycle, 717
— transport of calcium in rat liver, 743
Chain, respiratory, in cells and tissues, oxygen reaction with, Sept. suppl., p. 163
Chaos chaos, ameba, ionic and bioelectric properties, 151
Charge, surface, of isolated toad bladder epithelial cells, effect of hydrogen ion concentration and divalent ions on cell mobility, 501
Chemical, physico-, studies, old and new, of oxygen equilibrium of mammalian hemoglobin, Sept. suppl., p. 105
—, topo-, factors in potentiation of contraction by heavy metal cations, 937
Chemoreceptors, fresh-water fish, responsive to dilute solutions of electrolytes, 1241
Chick. *See* Fowl.
Chloride, sodium, and potassium concentrations in Schwann cell and axon of squid nerve fiber, 1
Chloroplasts, structure of red fluorescence band in, 763
Choroid and retinal pigment epithelium, isolated, potential, current, and ionic fluxes across, 913
Chromophores, visual pigment, colors, 381
Circular deoxyribonucleic acid, physical and topological properties, July suppl., p. 103
Cleavage, electrical characteristics of *Triturus* egg cells during, 1019
Coleoptiles, wheat, geotropic response in absence of amyloplast starch, 1065
Concentration, calcium ion, intracellular, effects on excitability of muscle fiber membrane of barnacle, 807
Concentrations, sodium, low external, sodium transport across frog skin at, 1161
— of sodium, potassium, and chloride in Schwann cell and axon of squid nerve fiber, 1
Conductance, sodium, increase in lobster giant axon, blockage by tarichatoxin (tetrodotoxin), 977
Cones and rods in rodents, early receptor potentials of, 1199
Contractility and excitability, cardiac, ionic dependence, 781
Contraction, potentiation of, by heavy metal cations, topochemical factors, 937
Copper oxidases, correlations between structure and function, Sept. suppl., p. 213
— proteins and oxygen, correlations between structure and function of copper oxidases, Sept. suppl., p. 213
Cortex, kidney, mammalian hibernators, characteristics of ion transport in, 1221
Crayfish central nervous system, isolated, source mechanisms for unit activity in, 597
Crustacean neuromuscular junctions, distribution of pre- and postsynaptic inhibition at, 457
— neuromuscular systems, analysis of interactions among electrogenic membrane components, 1335
— neuromuscular systems, immunity of electrogenic membrane components to tetrodotoxin and saxitoxin, 1319
Crystal-solution problem of sperm whale myoglobin, Sept. suppl., p. 75
Cultured chick heart cells, pacemaker and nonpacemaker, ionic interconversion, 867

Current, delayed, behavior under voltage clamp in supramedullary neurons of puffer, 613
—, potential, and ionic fluxes across isolated retinal pigment epithelium and choroid, 913

D

Delta function and sinusoidal responses of visual cells of *Limulus* eye, 565
Deoxyribonuclease-treated deoxyribonucleic acid in *Bacillus subtilis* transformation, integration, July suppl., p. 233
Deoxyribonucleate, transforming, mechanism of integration, July suppl., p. 183
Deoxyribonucleic acid from bacteriophage lambda, structure and function, July suppl., p. 29
— acid, circular, physical and topological properties, July suppl., p. 103
— acid, deoxyribonuclease - treated, in *Bacillus subtilis* transformation, integration, July suppl., p. 233
— acid, methylation, July suppl., p. 5
— acid molecules, arrangement of information in, July suppl., p. 143
— acid from phage-infected bacteria, properties, July suppl., p. 127
— acid, recombining, in pneumococcal transformation, genetic studies, July suppl., p. 211
— acid replication, enzymatic mechanisms, July suppl., p. 59
Deoxyribonucleic acid–dominated biological universe, problems of ribonucleic acid genome operating in, July suppl., p. 263
Depolarization, maximum rate, single muscle fiber in normal and low sodium solutions, 17
—, potassium, high, and acetylcholine, influence on calcium exchange in rat uterus, 1299
Depolarizing potassium inactivation and spike electrogenesis in electroplaques of *Electrophorus electricus*, L., 321
Desensitization of membrane receptors at neuromuscular junction, effect of calcium on, 963
Diffusivity measurements of human methemoglobin, 681
Dinitrophenol and oligomycin, effects on coupling between anaerobic metabolism and anaerobic sodium transport by isolated turtle bladder, 483
Dragonfly, components of visual system, 289
Drosophila, interactions of oxygen at high pressure and radiation in, 537

E

Egg cells, *Triturus*, during cleavage, electrical characteristics, 1019
Electrical characteristics of *Triturus* egg cells during cleavage, 1019
— properties of *Neurospora crassa*, effects of external cations on intracellular potential, 69
— properties of *Neurospora crassa*, respiration and intracellular potential, 93
— resistance of frog sartorius muscle, 897
— stimulation and calcium ion movement in sarcoplasmic reticulum, in vitro interaction, 689
— thresholds of taste sensations, temperature coefficients, 27
Electrogenesis, spike, and depolarizing potassium inactivation in electroplaques of *Electrophorus electricus*, L., 321
Electrogenic membrane components of crustacean neuromuscular systems, analysis of interactions among, 1335
— membrane components of crustacean neuromuscular systems, immunity to tetrodotoxin and saxitoxin, 1319
Electrolyte and water content and potassium flux in muscles from normal and hypophysectomized rats, effect of insulin on, 433
Electrolytes, fresh-water fish chemoreceptors responsive to dilute solutions of, 1241
Electrophoretic mobility, cellular, and mitotic cycle, 717
Electrophorus electricus, L., electroplaques, analysis of spike electrogenesis and depolarizing potassium inactivation in, 321
Electrophysiological organization of embryonic chick heart, 351
Electroplaques of *Electrophorus electricus*, L., analysis of spike electrogenesis and depolarizing potassium inactivation in, 321
Electrotonic spread in cardiac muscle of mouse, 1089

Embryonic chick heart, electrophysiological organization, 351
— chick heart, spread of excitation in, 365
End-group analysis, application of enzymatic phosphorylation of nucleic acids to, July suppl., p. 81
Enzymatic mechanisms of deoxyribonucleic acid replication, July suppl., p. 59
— phosphorylation of nucleic acids and its application to end-group analysis, July suppl., p. 81
Enzymes, flavoprotein, mechanisms of reaction with oxygen, Sept. suppl., p. 201
Epithelial cells, toad bladder, isolated, surface charge, effect of hydrogen ion concentration and divalent ions on mobility, 501
Epithelium, pigment, retinal, and choroid, isolated, potential, current, and ionic fluxes across, 913
Erythrocyte sizes, different, cell and solution velocity constants for reaction carbon monoxide + hemoglobin → carbonylhemoglobin at different temperatures in mammals with, 199
Erythrocytes, effect of size on kinetics of oxygen uptake, 727
—, estimation of life span in growing animal in different nutritional states, 57
—, human, uptake of quaternary ammonium ions by, 1147
Escherichia coli, cation transport in, potassium exchange, 469
— *coli*, cation transport in, regulation of cation content, 221
— *coli*, infection by phages T2 and T4, changes in leucine-specific soluble ribonucleic acid after, 1139
Euglena, phosphate-starved, phosphate uptake by, 1125
Excitability and contractility, cardiac, ionic dependence, 781
— of muscle fiber membrane of barnacle, effects of intracellular calcium ion concentration on, 807
Excitation in space-clamped squid axons, temperature characteristics, 1007
— spread in embryonic chick heart, 365
Extracellular. *See* Cell.
Extraocular muscles, cat, in vivo studies on fast and slow muscle fibers in, 1177
Eye, *Limulus*, sinusoidal and delta function responses of visual cells, 565

F

Fiber, muscle, membrane of barnacle, effects of intracellular calcium ion concentration on excitability of, 807
—, muscle, single, maximum depolarization rate in normal and low sodium solutions, 17
—, nerve, squid, sodium, potassium, and chloride concentrations in Schwann cell and axon of, 1
Fibers, muscle, fast and slow, in cat extraocular muscles, in vivo studies, 1177
—, muscle, interpretation of tracer washout curves from population of, 423
Fish, fresh-water, chemoreceptors responsive to dilute solutions of electrolytes, 1241
—, swim-bladder, active transport of oxygen and carbon dioxide into, 1209
Flavoprotein enzymes, mechanisms of reaction with oxygen, Sept. suppl., p. 201
Flies, red receptor, 265
Fluorescence band, red, in chloroplasts, structure, 763
Fowl heart cells, cultured, pacemaker and nonpacemaker, ionic interconversion, 867
— heart, embryonic, electrophysiological organization, 351
— heart, embryonic, spread of excitation in, 365
Frog sartorius muscle, activation heat in, 517
— sartorius muscle, electrical resistance, 897
— skin, sodium transport across, at low external sodium concentrations, 1161
Frogs, intact, and environment, sodium and potassium exchange between, 1111

G

Genetic studies of recombining deoxyribonucleic acid in pneumococcal transformation, July suppl., p. 211
Genome, ribonucleic acid, operating in deoxyribonucleic acid–dominated biological universe, problems of, July suppl., p. 263
Geotropic response of wheat coleoptiles in absence of amyloplast starch, 1065
Growing animal in different nutritional states, estimation of life span of red blood cells, 57
Gustatory neural response function, 247

H

Heart cells, chick, cultured, pacemaker and nonpacemaker, ionic interconversion, 867
—, chick, embryonic, electrophysiological organization, 351
—, chick, embryonic, spread of excitation in, 365
— muscle, cat, in vitro, cell ion and water contents in anisosmolal solutions, 641
Heat, activation, in frog sartorius muscle, 517
Hemoglobin + carbon monoxide → carbonylhemoglobin reaction, cell and solution velocity constants at different temperatures in mammals with different red cell sizes, 199
—, mammalian, oxygen equilibrium, old and new physicochemical studies, Sept. suppl., p. 105
— solutions, steady-state transport of oxygen through, 663
Hemophilus influenzae, nature of recombinants formed during transformation in, July suppl., p. 197
Hibernators, mammalian, kidney cortex, characteristics of ion transport in, 1221
Hodgkin-Huxley nerve model, theoretical effect of temperature on threshold, 989
Human. *See* Man.
Huxley-Hodgkin nerve model, theoretical effect of temperature on threshold, 989
Hydrogen ion concentration and divalent ions, effect on mobility of isolated toad bladder epithelial cells, 501
Hypophysectomized and normal rats, effect of insulin on potassium flux and water and electrolyte content on muscles from, 433

I

Ileum, rabbit, amino acid and sugar transport in, 849
Immunity of electrogenic membrane components of crustacean neuromuscular systems to tetrodotoxin and saxitoxin, 1319
Infection of *Escherichia coli* by phages T2 and T4, changes in leucine-specific soluble ribonucleic acid after, 1139
Information in deoxyribonucleic acid molecules, arrangement, July suppl., p. 143
Insulin effect on potassium flux and water and electrolyte content of muscles from normal and hypophysectomized rats, 433
Intestine, small, isolated, bullfrog, active transport of D-xylose in, 1029
Intracellular. *See* Cell.
Ion accumulation in muscle cells, 819
—, calcium, concentration, intracellular, effects on excitability of muscle fiber membrane of barnacle, 807
—, calcium, movement and electrical stimulation in sarcoplasmic reticulum, in vitro interaction, 689
—, cell, and water contents in anisosmolal solutions, cat heart muscle in vitro, 641
— transport in kidney cortex of mammalian hibernators, characteristics, 1221
Ionic and bioelectric properties of ameba *Chaos chaos*, 151
— dependence of cardiac excitability and contractility, 781
— fluxes, current, and potential across isolated retinal pigment epithelium and choroid, 913
— interconversion of pacemaker and nonpacemaker cultured chick heart cells, 867
— transport and salt coefficients, relation, 655
Ions, ammonium, quaternary, uptake by human erythrocytes, 1147
—, divalent, and hydrogen ion concentration, effect on mobility of isolated toad bladder epithelial cells, 501
—, manganese, tetrodotoxin, and procaine, effects on differences in sodium and calcium spikes, 793

K

Kidney cortex of mammalian hibernators, characteristics of ion transport in, 1221
Kinetic model for adaptation and light responses of *Phycomyces*, 925
Kinetics of oxygen uptake of red cells, effect of size, 727

L

Letter to Editor, 1351
Leucine-specific soluble ribonucleic acid, changes after infection of *Escherichia coli* by phages T2 and T4, 1139
Light responses and adaptation of *Phycomyces*, kinetic model for, 925
Limulus eye, sinusoidal and delta function responses of visual cells, 565

Liver, rat, cellular transport of calcium in, 743
Lobster axon, competitive action of calcium and procaine on, mechanism of action of local anesthetics, 1043
— giant axon, blockage of sodium conductance increase in, by tarichatoxin (tetrodotoxin), 977

M

Magnesium, calcium, and local anesthesia, 845
Mammalian hemoglobin, oxygen equilibrium, old and new physicochemical studies, Sept. suppl., p. 105
— hibernators, kidney cortex, characteristics of ion transport in, 1221
Mammals with different red cell sizes, cell and solution velocity constants for reaction carbon monoxide + hemoglobin → carbonylhemoglobin at different temperatures in, 199
Man, erythrocytes, uptake of quaternary ammonium ions by, 1147
—, methemoglobin, diffusivity measurements, 681
Manganese ions, tetrodotoxin, and procaine, effects on differences in sodium and calcium spikes, 793
Membrane components of crustacean neuromuscular systems, analysis of interactions among electrogenic components, 1335
— components of crustacean neuromuscular systems, immunity of electrogenic components to tetrodotoxin and saxitoxin, 1319
—, muscle fiber, barnacle, effects of intracellular calcium ion concentration on excitability of, 807
— receptors at neuromuscular junction, effect of calcium on desensitization of, 963
— structure and function, July suppl., p. 347
Metabolism, anaerobic, and anaerobic sodium transport by isolated turtle bladder, effects of dinitrophenol and oligomycin on coupling, 483
Metal binding and sugar transport in yeast, 235
— cations, heavy, topochemical factors in potentiation of contraction by, 937
Methemoglobin, human, diffusivity measurements, 681
Methylation of deoxyribonucleic acid, July suppl., p. 5
Mitotic cycle and cellular electrophoretic mobility, 717
Mobility, electrophoretic, cellular, and mitotic cycle, 717
— of isolated toad bladder epithelial cells, effect of hydrogen ion concentration and divalent ions on, 501
Molecules, deoxyribonucleic acid, arrangement of information in, July suppl., p. 143
Musca domestica screening pigment, absorption, 1087
Muscle, cardiac, mouse, electrotonic spread in, 1089
— cells, ion accumulation in, 819
— fiber membrane of barnacle, effects of intracellular calcium ion concentration on excitability of, 807
— fiber population, interpretation of tracer washout curves from, 423
— fiber, single, maximum depolarization rate in normal and low sodium solutions, 17
— fibers, fast and slow, in cat extraocular muscles, in vivo studies, 1177
—, heart, cat, in vitro, cell ion and water contents in anisosmolal solutions, 641
— oxygen consumption, variation with velocity of shortening, 9
—, sartorius, frog, activation heat in, 517
—, sartorius, frog, electrical resistance, 897
—, skeletal, calcium binding by particle-free supernatants of homogenates, 131
— volume changes, 387
Muscles, amphibian, osmotic properties, 37
—, extraocular, cat, in vivo studies on fast and slow muscle fibers in, 1177
— from normal and hypophysectomized rats, effect of insulin on potassium flux and water and electrolyte content, 433
Myoglobin, sperm whale, crystal-solution problem, Sept. suppl., p. 75
Myoglobin-facilitated diffusion of oxygen, Sept. suppl., p. 57

N

Nerve fiber, squid, sodium, potassium, and chloride concentrations in Schwann cell and axon of, 1
— model, Hodgkin-Huxley, theoretical

effect of temperature on threshold in, 989
Nervous system, central, isolated, crayfish, source mechanisms for unit activity in, 597
Neural response function, gustatory, 247
Neuromuscular junction, effect of calcium on desensitization of membrane receptors at, 963
— junctions, crustacean, distribution of pre- and postsynaptic inhibition at, 457
— systems, crustacean, analysis of interactions among electrogenic membrane components, 1335
— systems, crustacean, immunity of electrogenic membrane components to tetrodotoxin and saxitoxin, 1319
Neurons, supramedullary, puffer, behavior of delayed current under voltage clamp in, 613
Neurospora crassa, electrical properties, effects of external cations on intracellular potential, 69
— *crassa*, electrical properties, respiration and intracellular potential, 93
Nitella clavata, sodium and potassium fluxes in, 181
Nucleic acids, enzymatic phosphorylation of, and its application to end-group analysis, July suppl., p. 81
Nutritional states, different, of growing animal, estimation of life span of red blood cells in, 57

O

Oligomycin and dinitrophenol, effects on coupling between anaerobic metabolism and anaerobic sodium transport by isolated turtle bladder, 483
Organic compounds, sugars, steroids, and amino acids, penetration into interior of squid giant axon, 47
Osmotic properties of amphibian muscles, 37
Oxidases, copper, correlations between structure and function, Sept. suppl., p. 213
Oxidation with oxygen, mechanisms, Sept. suppl., p. 29
— and peroxidation, Sept. suppl., p. 131
Oxygen and carbon dioxide, active transport into swim-bladder of fish, 1209
— consumption, muscle, variation with velocity of shortening, 9
— and copper proteins, correlations between structure and function of copper oxidases, Sept. suppl., p. 213
Oxygen equilibrium of mammalian hemoglobin, old and new physicochemical studies, Sept. suppl., p. 10
—, evolution as biosynthetic reagent, Sept. suppl., p. 253
— at high pressure and radiation, interactions in *Drosophila*, 537
—, mechanisms of oxidation with, Sept. suppl., p. 29
—, mechanisms of reaction of flavoprotein enzymes with, Sept. suppl., p. 201
—, myoglobin-facilitated diffusion, Sept. suppl., p. 57
—, natural history, Sept. suppl., p. 5
— reaction with respiratory chain in cells and tissues, Sept. suppl., p. 163
—, steady-state transport through hemoglobin solutions, 663
— uptake of red cells, effect of size on kinetics, 727

P

Pacemaker and nonpacemaker cultured chick heart cells, ionic interconversion, 867
Peroxidation and oxidation, Sept. suppl., p. 131
Phage. *See* Bacteriophage.
Phosphate uptake by phosphate-starved *Euglena*, 1125
Phosphate-starved *Euglena*, phosphate uptake by, 1125
Phosphorylation, enzymatic, of nucleic acids and its application to end-group analysis, July suppl., p. 81
Phycomyces, kinetic model for adaptation and light responses, 925
Physical and topological properties of circular deoxyribonucleic acid, July suppl., p. 103
Physicochemical studies, old and new, of oxygen equilibrium of mammalian hemoglobin, Sept. suppl., p. 105
Physiological, electro-, organization of embryonic chick heart, 351
Pigment chromophores, visual, colors, 381
— epithelium, retinal, and choroid, isolated, potential, current, and ionic fluxes across, 913
—, screening, *Musca domestica*, absorption, 1087
Pneumococcal transformation, genetic studies of recombining deoxyribonucleic acid in, July suppl., p. 211

Polysaccharide biosynthesis, July suppl., p. 331
Postsynaptic and presynaptic inhibition, distribution at crustacean neuromuscular junctions, 457
Potassium depolarization, high, and acetylcholine, influence on calcium exchange in rat uterus, 1299
— exchange in *Escherichia coli*, 469
— flux and water and electrolyte content of muscles from normal and hypophysectomized rats, effect of insulin on, 433
— inactivation, depolarizing, and spike electrogenesis in electroplaques of *Electrophorus electricus*, L., 321
— inactivation and tetraethylammonium action in supramedullary cells of puffer, 629
—, sodium, and chloride concentrations in Schwann cell and axon of squid nerve fiber, 1
— and sodium exchange between intact frogs and environment, 1111
— and sodium fluxes in *Nitella clavata*, 181
— and sodium, inside and outside, interaction between effects of, on bullfrog skin potential, 309
— uptake by beetroot tissue, influence of intracellular potential, 551
Potential, current, and ionic fluxes across isolated retinal pigment epithelium and choroid, 913
—, intracellular, effects of external cations on, electrical properties of *Neurospora crassa*, 69
—, intracellular, influence on potassium uptake by beetroot tissue, 551
—, intracellular, and respiration, electrical properties of *Neurospora crassa*, 93
—, skin, bullfrog, interaction between effects of inside and outside sodium and potassium on, 309
Potentials, receptor, early, of rods and cones in rodents, 1199
Potentiation of contraction by heavy metal cations, topochemical factors, 937
Presynaptic and postsynaptic inhibition, distribution at crustacean neuromuscular junctions, 457
Procaine and calcium, competitive action on lobster axon, mechanism of action of local anesthetics, 1043
—, tetrodotoxin, and manganese ions, effects on differences in sodium and calcium spikes, 793
Protein biosynthesis, problems in, July suppl., p. 305
Proteins, copper, and oxygen, correlations between structure and function of copper oxidases, Sept. suppl., p. 213
Puffer, supramedullary cells, analysis of potassium inactivation and tetraethylammonium action in, 629
—, supramedullary neurons, behavior of delayed current under voltage clamp in, 613

Q

Quaternary ammonium ions, uptake by human erythrocytes, 1147

R

Radiation and oxygen at high pressure, interactions in *Drosophila*, 537
Receptor potentials, early, of rods and cones in rodents, 1199
—, red, of flies, 265
— response in Venus's fly-trap, 117
Receptors, membrane, at neuromuscular junction, effect of calcium on desensitization of, 963
Red blood cells. *See* Erythrocytes.
Red fluorescence band in chloroplasts, structure, 763
— receptor of flies, 265
Replication, deoxyribonucleic acid, enzymatic mechanisms, July suppl., p. 59
Resistance, electrical, of frog sartorius muscle, 897
Respiration and intracellular potential, electrical properties of *Neurospora crassa*, 93
Respiratory chain in cells and tissues, oxygen reaction with, Sept. suppl., p. 163
— control, mechanism, Sept. suppl., p. 149
Responses, light, and adaptation of *Phycomyces*, kinetic model for, 925
Reticulum, sarcoplasmic, in vitro interaction of electrical stimulation and calcium ion movement in, 689
Retina, blue arcs, 405
Retinal pigment epithelium and choroid, isolated, potential, current, and ionic fluxes across, 913
Ribonucleic acid genome operating in deoxyribonucleic acid–dominated biological universe, problems of, July suppl., p. 263
— acid, soluble, leucine-specific, changes

after infection of *Escherichia coli* by phages T2 and T4, 1139
Rodents, early receptor potentials of rods and cones in, 1199
Rods and cones in rodents, early receptor potentials of, 1199

S

Salt and ionic transport coefficients, relation, 655
Sarcoplasmic reticulum, in vitro interaction of electrical stimulation and calcium ion movement in, 689
Sartorius muscle, frog, activation heat in, 517
— muscle, frog, electrical resistance, 897
Saxitoxin and tetrodotoxin, immunity of electrogenic membrane components of crustacean neuromuscular systems to, 1319
Schwann cell and axon of squid nerve fiber, sodium, potassium, and chloride concentrations in, 1
Screening pigment, *Musca domestica*, absorption, 1087
Shortening velocity, variation of muscle oxygen consumption with, 9
Sinusoidal and delta function responses of visual cells of *Limulus* eye, 565
Skeletal muscle, calcium binding by particle-free supernatants of homogenates, 131
Skin, frog, sodium transport across, at low external sodium concentrations, 1161
— potential, bullfrog, interaction between effects of inside and outside sodium and potassium on, 309
Sodium and calcium spikes, differences, effects of tetrodotoxin, procaine, and manganese ions, 793
— concentrations, low external, sodium transport across frog skin at, 1161
— conductance increase in lobster giant axon, blockage by tarichatoxin (tetrodotoxin), 977
—, potassium, and chloride concentrations in Schwann cell and axon of squid nerve fiber, 1
— and potassium exchange between intact frogs and environment, 1111
— and potassium fluxes in *Nitella clavata*, 181
— and potassium, inside and outside, interaction between effects of, on bullfrog skin potential, 309
Sodium solutions, normal and low, maximum depolarization rate of single muscle fiber in, 17
— transport, anaerobic, and anaerobic metabolism by isolated turtle bladder, effects of dinitrophenol and oligomycin on coupling, 483
— transport across frog skin at low external sodium concentrations, 1161
Solution and cell velocity constants for reaction carbon monoxide + hemoglobin → carbonylhemoglobin at different temperatures in mammals with different red cell sizes, 199
Solution-crystal problem of sperm whale myoglobin, Sept. suppl., p. 75
Solutions, anisosmolal, cell ion and water contents in, cat heart muscle in vitro, 641
—, dilute, of electrolytes, fresh-water fish chemoreceptors responsive to, 1241
—, hemoglobin, steady-state transport of oxygen through, 663
—, sodium, normal and low, maximum depolarization rate of single muscle fiber in, 17
Space-clamped squid axons, temperature characteristics of excitation in, 1007
Spike electrogenesis and depolarizing potassium inactivation in electroplaques of *Electrophorus electricus*, L., 321
Spikes, sodium and calcium, differences, effects of tetrodotoxin, procaine, and manganese ions, 793
Squid axons, space-clamped, temperature characteristics of excitation in, 1007
— giant axon, penetration of sugars, steroids, amino acids, and other organic compounds into interior, 47
— nerve fiber, sodium, potassium, and chloride concentrations in Schwann cell and axon of, 1
Starch, amyloplast, geotropic response of wheat coleoptiles in absence of, 1065
Steroids, sugars, amino acids, and other organic compounds, penetration into interior of squid giant axon, 47
Stimulation, electrical, and calcium ion movement in sarcoplasmic reticulum, in vitro interaction, 689
Sugar and amino acid transport in rabbit ileum, 849
— transport and metal binding in yeast, 235

Sugars, steroids, amino acids, and other organic compounds, penetration into interior of squid giant axon, 47
Supramedullary cells, puffer, analysis of potassium inactivation and tetraethylammonium action in, 629
— neurons, puffer, behavior of delayed current under voltage clamp in, 613
Swim-bladder of fish, active transport of oxygen and carbon dioxide into, 1209

T

Tarichatoxin (tetrodotoxin), blockage of sodium conductance increase in lobster giant axon by, 977
Taste sensations, temperature coefficients of electrical thresholds, 27
Temperature characteristics of excitation in space-clamped squid axons, 1007
— coefficients of electrical thresholds of taste sensations, 27
—, theoretical effect on threshold in Hodgkin-Huxley nerve model, 989
Temperatures, different, effect on cell and solution velocity constants for reaction carbon monoxide + hemoglobin → carbonylhemoglobin in mammals with different red cell sizes, 199
Tetraethylammonium action and potassium inactivation in supramedullary cells of puffer, 629
Tetrodotoxin (tarichatoxin), blockage of sodium conductance increase in lobster giant axon by, 977
—, procaine, and manganese ions, effects on differences in sodium and calcium spikes, 793
— and saxitoxin, immunity of electrogenic membrane components of crustacean neuromuscular systems to, 1319
Tissue, beetroot, influence of intracellular potential on potassium uptake by, 551
Tissues and cells, oxygen reaction with respiratory chain in, Sept. suppl., p. 163
Toad bladder epithelial cells, isolated, surface charge, effect of hydrogen ion concentration and divalent ions on mobility, 501
Topochemical factors in potentiation of contraction by heavy metal cations, 937
Topological and physical properties of circular deoxyribonucleic acid, July suppl., p. 103
Tracer washout curves from population of muscle fibers, interpretation, 423
Transformation, *Bacillus subtilis*, integration of deoxyribonuclease-treated deoxyribonucleic acid in, July suppl., p. 233
— in *Hemophilus influenzae*, nature of recombinants formed during, July suppl., p. 197
—, pneumococcal, genetic studies of recombining deoxyribonucleic acid in, July suppl., p. 211
Transforming deoxyribonucleate, mechanism of integration, July suppl., p. 183
Transport, active, of oxygen and carbon dioxide into swim-bladder of fish, 1209
—, active, of D-xylose in isolated small intestine of bullfrog, 1029
—, amino acid and sugar, in rabbit ileum, 849
—, cation, in *Escherichia coli*, potassium exchange, 469
—, cation, in *Escherichia coli*, regulation of cation content, 221
—, cellular, of calcium in rat liver, 743
—, ion, in kidney cortex of mammalian hibernators, characteristics, 1221
—, ionic, and salt coefficients, relation, 655
—, sodium, anaerobic, and anaerobic metabolism by isolated turtle bladder, effects of dinitrophenol and oligomycin on coupling, 483
—, sodium, across frog skin at low external sodium concentrations, 1161
—, steady-state, of oxygen through hemoglobin solutions, 663
—, sugar, and metal binding in yeast, 235
Triturus egg cells during cleavage, electrical characteristics, 1019
Turtle bladder, isolated, effects of dinitrophenol and oligomycin on coupling between anaerobic metabolism and anaerobic sodium transport by, 483

U

Unit activity in isolated crayfish central nervous system, source mechanisms for, 597
Uterus, rat, calcium distribution and exchange in, 1265
—, rat, influence of high potassium depolarization and acetylcholine on calcium exchange in, 1299

V

Venus's fly-trap, receptor response, 117
Visual cells of *Limulus* eye, sinusoidal and delta function responses, 565

Visual pigment chromophores, colors, 381
— system of dragonfly, components, 289
Voltage clamp, behavior of delayed current under, in supramedullary neurons of puffer, 613

W

Water and cell ion contents in anisosmolal solutions, cat heart muscle in vitro, 641
— and electrolyte content and potassium flux in muscles from normal and hypophysectomized rats, effect of insulin on, 433
Whale, sperm, myoglobin, crystal-solution problem, Sept. suppl., p. 75
Wheat coleoptiles, geotropic response in absence of amyloplast starch, 1065

X

D-Xylose, active transport in isolated small intestine of bullfrog, 1029

Y

Yeast, sugar transport and metal binding in, 235
